

Set up 2-factor authentication in 10 minutes

Looking to secure access to your company data in no time? ESET Secure Authentication gives your people super-easy secure access from anywhere.

You can use ESET Secure Authentication for:

- Accessing your company's VPN
- Protecting sign in into an operating system
- Web/cloud services such as Office 365 and Google Apps
- Outlook Web Access (OWA)
- Exchange Control Panel 2010 & Exchange Administrator Centre 2013
- and more

This is how you can quickly protect your VPN:
